github.com/nallaninaresh | portfolio.com

Career Objective

To obtain an entry-level position as a Java BackEnd Developer where I can apply my knowledge of Core Java, Spring Boot, REST APIs, MySQL, Spring JPA, JavaScript to develop reliable and user-friendly web applications. Eager to contribute to real-world projects, enhance my technical expertise, and grow as a software developer while contributing to organizational success.

Skills

Programming Languages: Java, SQL, JavaScript

Frameworks: Spring Boot, Spring MVC, Hibernate, JPA, Servlets, JSP

Databases: MySQL, OracleSQL

Developer Tools: Git, GitHub, Maven, Postman, Eclipse, Tomcat

Core Concepts: REST APIs, JDBC, OOP, Collections, Multithreading, JWT Authentication

Projects

ReUseHub: Sustainable Item Exchange Platform — Java, Spring Boot, React.js, MySQL 2025

- Designed and developed a full-stack item donation and exchange platform capable of handling real-time listings, categories, and automated reservation workflows for hundreds of concurrent users.
- Improved API response throughput by approximately 45% and reduced database query latency by implementing B-tree indexing and optimized REST endpoints.
- Implemented transactional database locking and ACID-compliant state machines to eliminate race conditions and prevent duplicate claims during simultaneous user requests.
- Built responsive user and admin tracking dashboards in React.js featuring real-time status transitions, dynamic search filtering, and inventory managers, cutting page render time by 35%.

TalentTrack Job Portal System — Java, Spring Boot, React.js, Hibernate 2025

- Designed and built a two-sided recruitment platform connecting job seekers with recruiters through structured candidate screening and applicant tracking workflows.
- Improved search filter efficiency by approximately 35% using normalized schema architectures and Hibernate ORM relational mappings (@OneToMany, @ManyToOne).
- Implemented Role-Based Access Control (RBAC) and secure authentication guards to separate Candidate application flows from Recruiter administrative endpoints.
- Built modular pipeline tracking interfaces in React.js allowing real-time stage updates (Applied -> Shortlisted -> Interview -> Decision) with automated notification triggers.

Education

Bachelor of Technology (B.Tech) 2022 – 2026
Anantha Lakshmi Institute of Technology and Sciences *CGPA : 8.3/10*

Intermediate (MPC) 2020 – 2022
Narayana Junior College *Percentage : 87.7%*

Secondary School Certificate (SSC) 2020
Keshava Reddy Concept EM High School *Percentage : 100%*

Awards & Certifications

- Full Stack Java Certified ExcelR EdTech in collab with APSCHE – JAVA (2025): Certified in enterprise Java architecture, RESTful API integration, and relational database management.
- Web Full Stack Developer Virtual Internship – ExcelR EdTech (2025): Validated expertise in building full-stack web architectures using HTML5, CSS3, JavaScript, React.js, Java, Spring Boot, and RESTful microservices.
